

UNIVERSAL DESIGN

Le luxe d'être accessible à tous

I am looking for partners in the hospitality, leisure, and real estate sectors to offer innovative and accessible housing solutions to your clients. As a Universal Design expert and space designer for future projects and renovations, my uniqueness lies in my personal experience as a person with a disability since birth, coupled with a degree in Business Administration from the University of Illinois.

With my deep understanding of specific ergonomic, functional, and space optimization needs, I am perfectly equipped to meet your clients' expectations. Since 2004, I have developed an innovative approach by providing housing solutions that offer optimal comfort for everyone, in line with the principles of Universal Design, whose motto should be "Where there is a will, there is a way," making me a pioneer in this field.

Praises from The New York Times

My concepts have received numerous awards. In 2009, I was honored with the Universal Design Award and the Consumer Favorite Award for the renovation of my house, even earning praise from The New York Times in a dedicated article. Since then, I have accumulated international awards in design and architecture. My greatest success is the concept of a 4m² "AquaZen®" bathroom accessible to everyone, including wheelchair

sérénité®

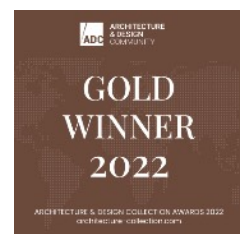

users! This solution is integrated into all my models, and I personally use it every day.

The Room

Universal design for all

Whether for a small 60m² house, Hospitality Lodge®, or a 100m² "La Villa®," my models offer total accessibility for everyone's comfort. In response to the growing demand in the hospitality sector, I have recently launched new concepts, including the Universal Design room for all "Serenity®," which incorporates the famous 4m² bathroom. This room was awarded the iF Design Award 2020 and the Outstanding Property Award London Winner 2019 for its interior design, allowing everyone to find new comfort. It's a brand new concept for the hospitality industry. The minimum room size can be 15m². This concept increases the

Hospitality Lodge® 60 m²

Chambre & "AquaZen®" de 4 m²

number of rooms for customers who do not wish to stay in an accessible room and ensures hoteliers attract a new clientele.

sérénité +[®]

INTERNATIONAL ARCHITECTURE & DESIGN AWARDS 2023

Unparalleled Accessibility Comfort

Furthermore, the concept of the "Serenity+[®]" room is a world-unique accessible room that can be offered as one of the accessible rooms. This concept won the prestigious Gold Winner at the Architecture & Design Collection Awards 2022. This room provides unparalleled accessibility comfort for people with reduced mobility. Imagine, from their bed, occupants can be effortlessly transferred to the bathroom, with washing toilets and a wall-mounted shower seat.

Parking Solutions

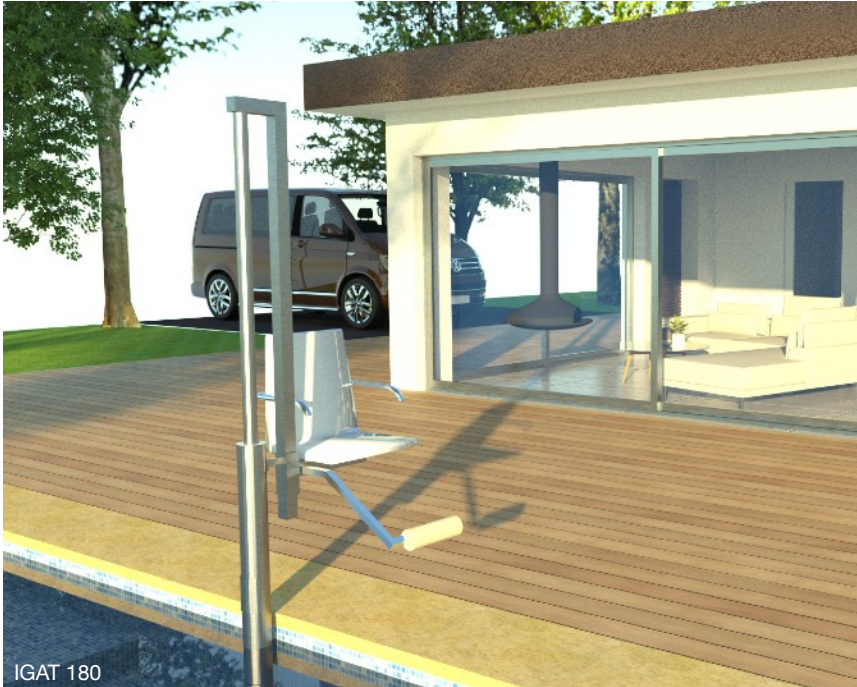

In addition to designing exceptional models, I offer redesign advice to address your clients' accessibility issues for those seeking a comfortable living space. My vision also extends to urban planning, providing solutions to parking and pedestrian crossing issues.

Une accessibilité sans compromis.

Universal Design Technological Watch

If you opt for a pool for your clients, my technological watch always leads me to

IGAT 180

Universal Design products. For instance, the IGAT-180-135. Designed for public and private pools, it offers a practical solution for people with disabilities to access water independently. Compliant with ADA standards (American Disability Act), it only requires a simple water connection to be operational.

Don't miss the opportunity to discover these world-unique concepts I have envisioned to transform our housing vision. Prepare for a revolution in this field for more comfort that I am convinced will meet all our needs.

Join me, and let's become partners. Together, let's offer your clients innovative, accessible, and suitable solutions for everyone.
